

ACCELERATE SMARTER PAYMENTS

halo.

Halo Dot provides certified, secure and modular software that allows anyone to accept contactless payments directly on their mobile phone.

What is SoftPOS?

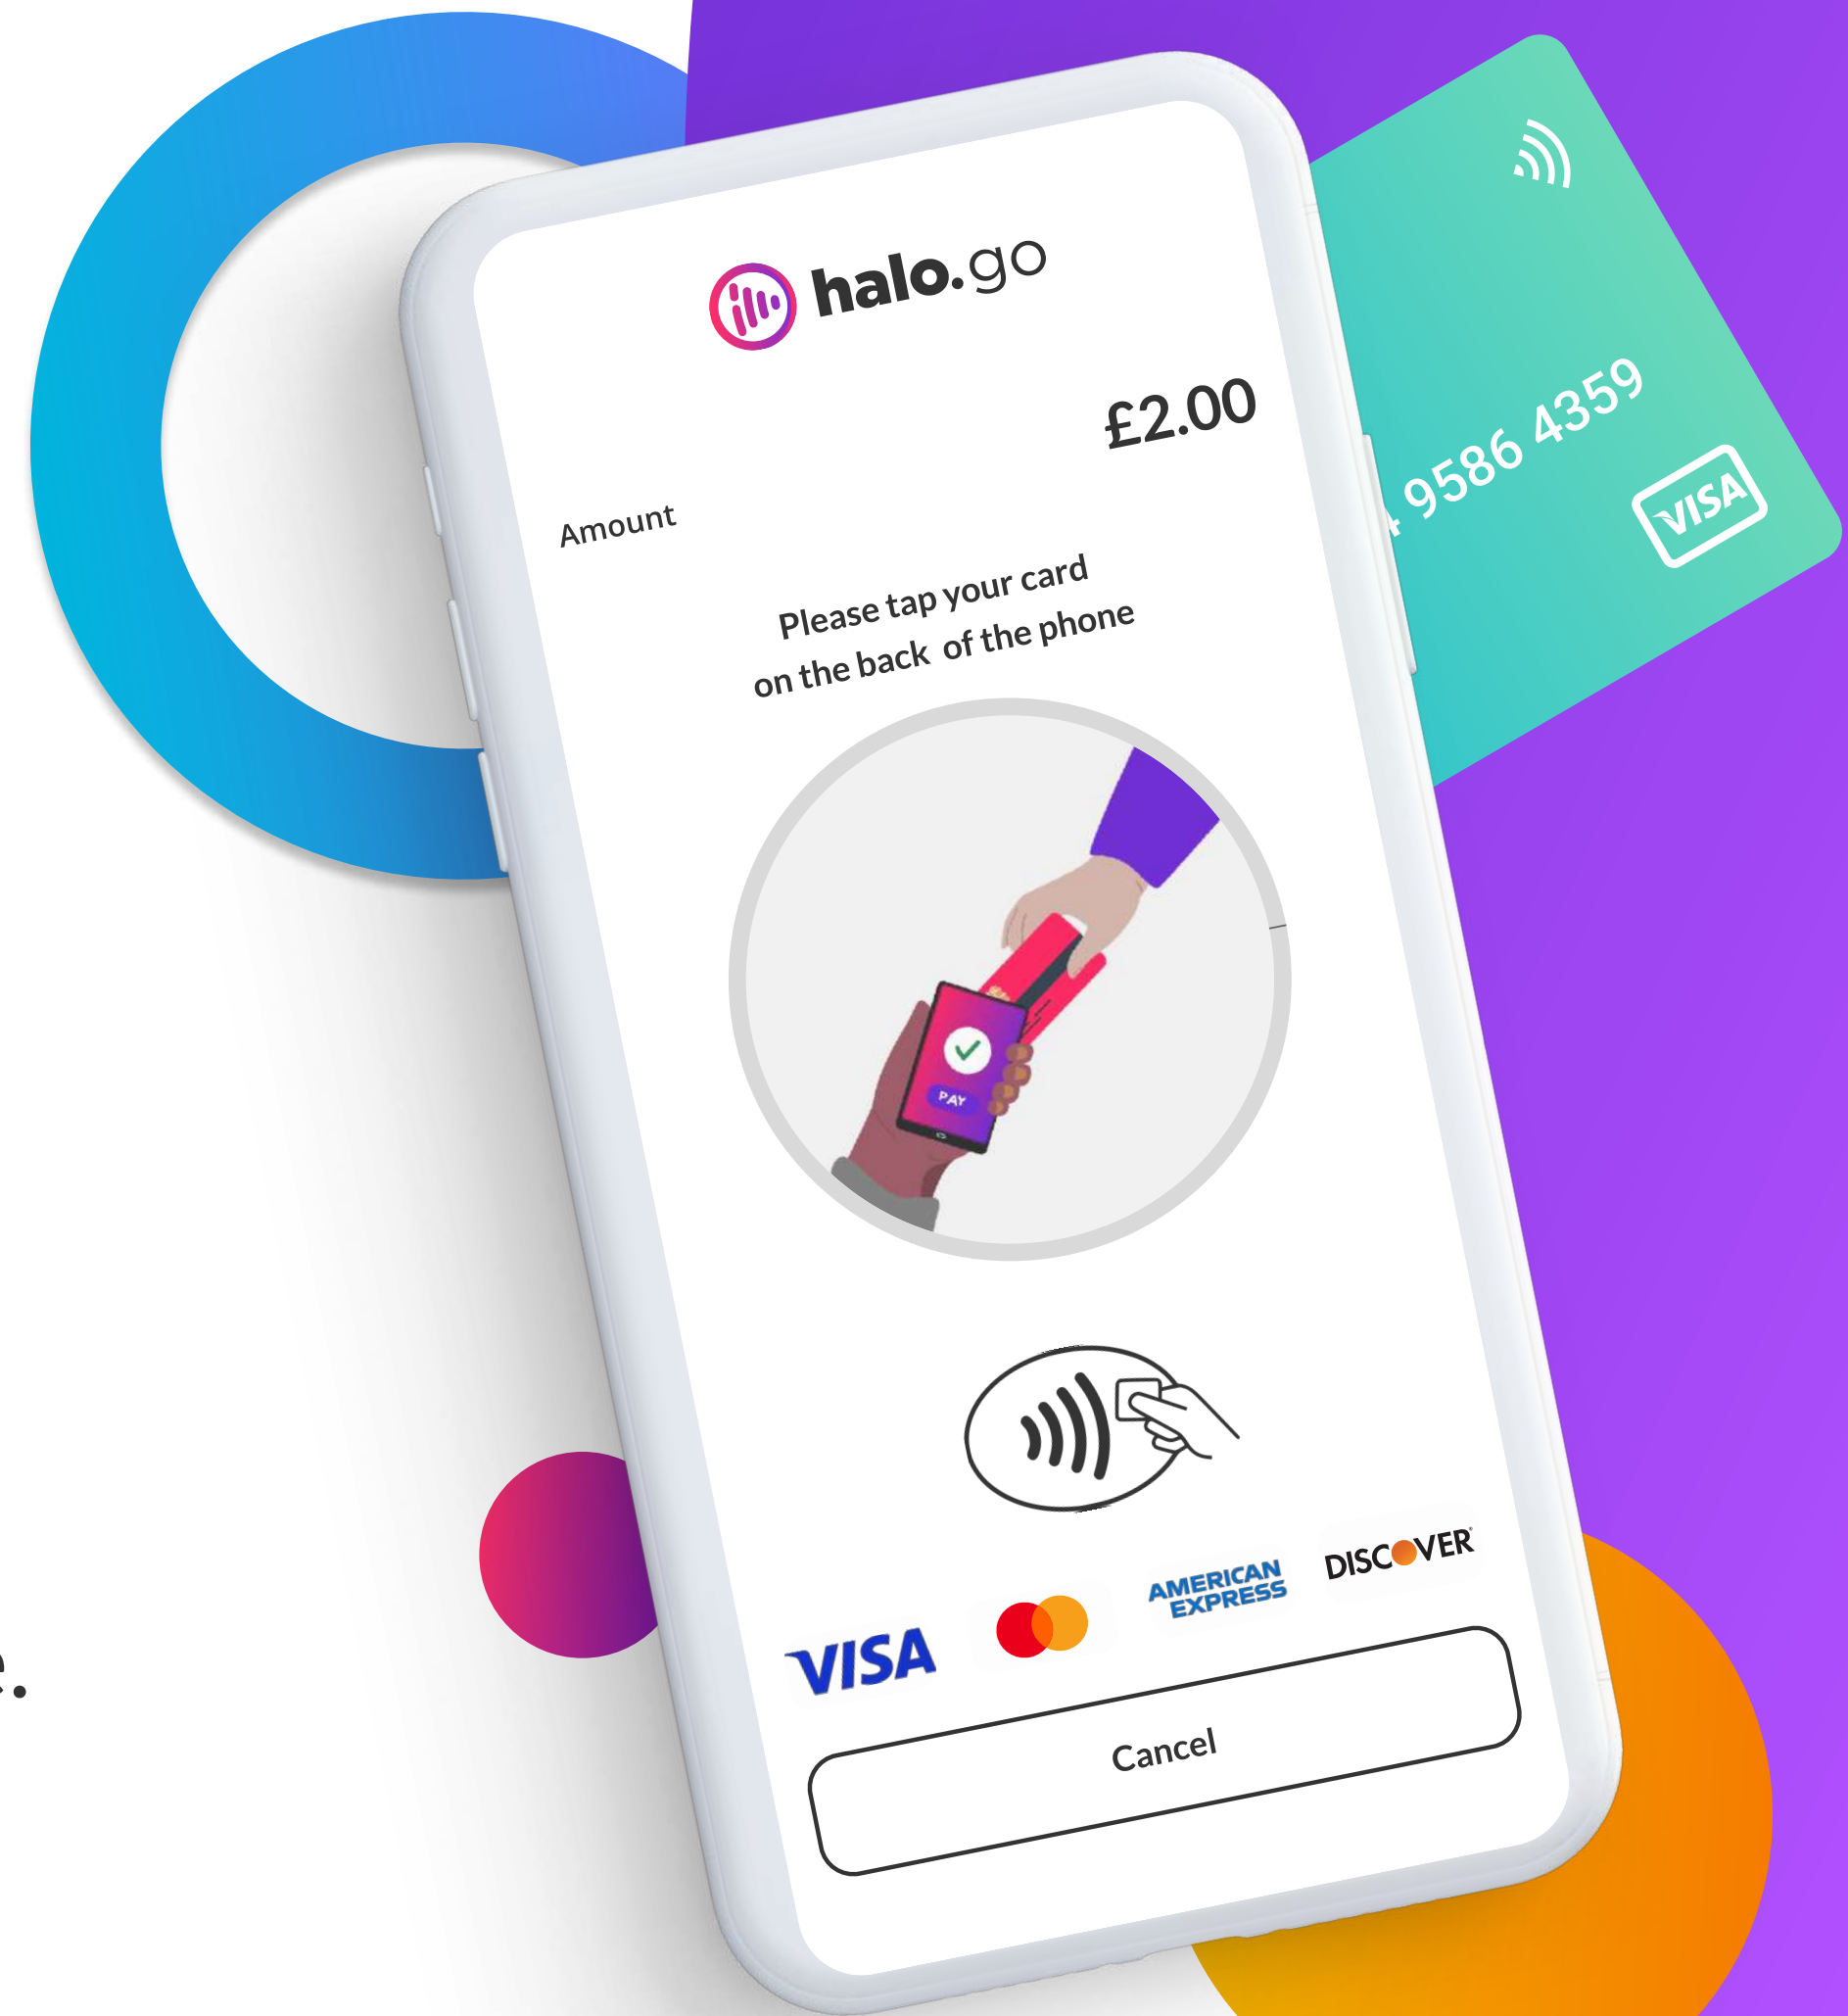

SoftPOS describes software-based Point-of-Sale applications that enable contactless payments on any mobile device. This eliminates the need for traditional hardware-based POS terminals, providing instant access to a scalable payment solution. SoftPOS creates better user experiences & transforms payment acceptance.

Why use SoftPOS?

SoftPOS allows merchants to trade instantly and scale their points of sale with ease. It eliminates the need for upfront investment, complex logistics, and the rental costs for POS hardware. Using a mobile device, you can accept payments instantly from anywhere.

Who is Halo Dot for?

Our technology is available to Banks, Acquirers, Payment Facilitators, ISO's, Aggregators, and any Fintech looking to integrate card payments into their apps. Our software is modular and is available in various form factors, from embedded SDK to stand-alone white-label Apps.

Pay

Benefits of Halo Dot and our unique SoftPOS solution.

Payment Orchestration

Halo Dot connects to several gateways or processors and can facilitate dynamic routing.

PIN on Glass

Halo Dot provides secure PIN Entry for transactions above the contactless limit.

Compliant

Halo Dot complies with all scheme and payment industry certifications.

Multi-Acquirer

Multiple integration options are available to Acquirers and Payfac's.

Cloud POS

Powered by AWS, our Cloud POS Platform provides global availability and terminals.

Accessible on Web and Mobile

Halo Dot software can be used on any NFC-based Android device to accept card payments. Our cloud-based Terminal Management System (TMS) is available to integrators and merchants to view transaction details and manage all their users and devices.

Payment technology for merchants

Halo.Plus is a feature-rich application that allows you to apply your own branding to a pre-certified, PCI compliant App. Halo.Plus is great for any business that wants to accept payments without taking on the overheads of development and ongoing PCI compliance.

Halo.Link is a companion app that allows your existing App to process contactless card transactions. Your branding and style can be applied to the companion app and invoked through intents or deep linking. Halo.Link is compatible with all mobile Apps as well as websites.

Halo.SDK is a software development kit that allows integrators to embed the contactless functionality into their own mobile apps. It complies with all PCI and data protection standards, and includes secure PIN Entry (PIN on Glass) functionality. Halo.SDK is core to all our products.
